TPG Ups the Ante with New Bundle Deal

Sydney, 10 November 2011 – TPG has taken its award winning Unlimited ADSL2+ with Home Phone product to another level with the introduction of a new \$69.99 per month Bundle deal.

In addition to TPG's popular Unlimited ADSL2+ and Home Phone Line Rental, the new Bundle also includes:

- Unlimited Local Calls (includes calls to 13/1300 numbers)
- Unlimited Standard National Calls to Landlines (excludes calls to Australian Mobiles and Directory Services)
- 100 International Minutes per Month (excludes calls to Satellite phones)
- Wi-Fi Modem Router

TPG believes this Bundle offers more value than other competitors' bundle offerings.

"TPG is taking another step forward in this competitive marketplace by introducing what we believe is the greatest consumer bundle TPG has ever offered" said Craig Levy, TPG's General Manager of Sales and Marketing.

The unlimited calls aspect of this Bundle is made possible by TPG's own Voice Network. With presence in 65 out of 66 Call Collection Areas in Australia, TPG directly terminates local and national calls without using any third party providers.

TPG attracts a large number of customers with international backgrounds. The 100 International Minutes per month comprises of calls to all countries including international landlines and mobiles.

TPG also includes a Wi-Fi Modem Router for the first time in its bundle offering and by doing so has typically lowered the once off fees customers have to pay at sign up.

"In this Wi-Fi generation, many devices within a home require access to the Internet via wireless technology such as laptops, smartphones, iPads, and gaming consoles. The included Wi-Fi Modem Router from TPG enables these devices to wirelessly gain access to the Internet, therefore taking advantage of the Unlimited ADSL2+ access pipe" added Mr. Levy.

This Bundle is based on a 24 month contract and is only available for new customers. For customers who prefer shorter term contracts, TPG continues to offer its award winning \$59.99 Unlimited ADSL2+ with Home Phone Bundle which is available on 6 and 18 month options.
